(54) Title: UPNP-BASED MEDIA CONTENTS REPRODUCING SYSTEM AND METHOD THEREOF

(57) Abstract: Disclosed are a UPnP-based media contents reproducing system and a method thereof capable of fast and consecutively reproducing media contents reproduced by a first control point in another space by a second control point by informing state information of the media contents reproduced by the first control point to the second control point. The media contents reproducing system comprises a media server, a media renderer, and a first control point for controlling the media server and the media renderer, and transmitting rendering state information of the media renderer to the second control point.
